

POOLoxy

Eliminates risk of Brain-Eating Amoeba in pools and water systems.

BRAIN-EATING AMOEBA (Naegleria fowleri)

**RARE BUT DEADLY –
STAY INFORMED, STAY SAFE**

WHAT IS IT?

- A microscopic amoeba found in warm freshwater and soil
- Causes Primary Amebic Meningoencephalitis (PAM) - a severe brain infection
- Infection is rare but usually fatal

WHERE THE RISK EXISTS

- Warm lakes, rivers, hot springs; shallow, stagnant warm water
- Poorly maintained swimming pools, spas/hot tubs, splash pads
- Neti pots/sinus rinsing when non-sterile water is used

PREVENTION & CONTROL (NATURAL WATERS)

- Avoid diving, jumping, or submerging your head in warm freshwater
- Use nose clips and avoid stirring up bottom sediment

SYMPTOMS (EARLY -> SEVERE)

- Headache, fever, nausea, vomiting
- Stiff neck, confusion, seizures, hallucinations

Seek urgent medical care if symptoms appear after freshwater exposure

PREVENTION & CONTROL (POOLS, SPAS, SPLASH PADS)

- Maintain filtration and circulation
- Keep a proper disinfectant residual at all times per local standards
- **Shock treat** after heavy use or contamination
- **With PoolOxy:** a powerful oxidation that reduces organic load and biofilm, helping you maintain safe disinfection levels and eliminate the risk in properly maintained pools
